Contents

PESTICIDE USAGE IN THE UNITED STATES:
Trends During the 20th Century

PART ONE
INTRODUCTION AND SUMMARY

A. Purpose and Scope 1-1
B. Organization of Report 1-2
C. Approach 1-3
D. Executive Summary 1-4
E. Summary of Findings 1-5

PART TWO
BACKGROUND ON HISTORY OF PESTICIDE USE AND REGULATION IN THE U.S.

A. Historical Emergence of Pesticide Technology 2-1
B. Overview of Pesticide Regulatory History in U.S. 2-9
C. Evolution of Types of Pesticides 2-15

PART THREE
PROFILE OF CURRENT OVERALL U.S. PESTICIDE USAGE

A. Background on Pesticide Types and Usage Sectors 3-1
B. Sources of Information 3-3
C. Current Overall Pesticide Usage, by Type 3-5
D. Volume of Conventional/Other Pesticides Used by Sector, 1997 3-8
E. Expenditures for Conventional/Other Pesticides by Type and Sector, 1997 3-13
F. Overview of U.S. Land Area and Overall Pesticide Usage 3-18
G. Current U.S. Pesticide Usage Compared to the World 3-24
PART FOUR

LONG TERM TRENDS IN OVERALL U.S. PESTICIDE USAGE

A. Approach and Data Sources 4-1
B. Total Usage of Conventional/Other Pesticides, 1929/97 4-4
C. Usage of Conventional/Other Pesticides by Sector, 1929/97 4-8
D. Usage of Conventional/Other Pesticides by Type of Pesticide, 1929/97 4-14
E. Trends in The Types of Chemistry Being Used as Pesticides, 1930/97 4-16
F. User Expenditures for Conventional/Other Pesticides, by Type of Pesticide and Sector, 1979/97 4-25

PART FIVE

AGRICULTURAL PESTICIDE USAGE TRENDS

A. Profile of Agricultural Applicator Sector 5-1
B. Principal Chemicals Available to Farmers Before End of WWII 5-4
C. Approach and Information Sources, Circa 1930 to Date 5-6
D. Overall Conventional/Other Pesticide Usage and Crop Acreage, 1929/97 5-7
E. Agricultural Pesticide Usage by Type, Conventional and Other Chemicals, 1929/97 5-9
F. Average Pesticide Usage Per Crop Acre, 1929/97 5-11
G. Agricultural Pesticide Usage by Type (Class) of Pesticide, 1929/97 5-13
H. Active Ingredient Usage, by Crop Grouping, 1988/97 5-15
I. Expenditures for Agricultural Pesticides, 1929/97 5-23

PART SIX

TRENDS IN HOME AND GARDEN USAGE BY HOMEOWNERS

A. Profile of Home and Garden User Sector 6-1
B. Quantitative Characteristics of Home and Garden Usage, 1990 6-5
C. Home and Garden Pesticide Usage, by Type, 1929/97 6-14
D. Home and Garden Pesticide User Expenditures, 1979/97 6-20

PART SEVEN

INDUSTRIAL/COMMERCIAL/GOVERNMENTAL USAGE TRENDS

A. Profile of Professional Pesticide Applicator Sector 7-1
B. Brief History of Applicator Industry 7-18
C. Professional Market Pesticide Usage, by Type, 1929/97 7-20
D. Professional Market User Expenditures, 1979/97 7-25

BIBLIOGRAPHY

GLOSSARY

APPENDICES
   Appendix 3A
   Appendix 4
   Appendix 5
ACKNOWLEDGMENTS

The author wishes to acknowledge the U.S. Environmental Protection Agency, Office of Pesticide Programs, Biological and Economic Analysis Division for its staff support of this project over several years resulting in the collection, analysis and dissemination of information on quantities of pesticides used in the United States. The result has been a wide range of usage information being assembled and made available for use by agency staff, other agencies, industry, user groups and the general public. Most of the drafting of this report was done by the author while at EPA prior to retirement from the U.S. Civil Service in August, 2000. The author very much appreciates being given time to work on this project, in an office busy with many competing priorities.

The author would like to acknowledge a number of persons who reviewed a draft version of this report. They include: Art Grube, Bob Torla, George Kiett and Roger Holtorf of EPA; Merritt Padgitt and Doug Kleweno of USDA: Mary Ward of US NCI; Steve Wanser of US ITC; Bob Taylor, Auburn Univ.; Leonard Gianessi, NCFAP; Mancur Cyr, Kline and Co.; Steve Maguire, McGill Univ.; Phil Calderoni, SRI Consulting; Phil Kearney, USDA, retired; John Wilkin, Doane Market Research; and Ed Johnson, Technical Services Group. Their efforts and input are very much appreciated. Numerous suggestions were forthcoming and were accommodated insofar as feasible.

Finally, I would like to thank Ron Stinner, Director, Center For Integrated Pest Management for enabling the publication of this report. CIIPM is a very logical outlet for this document. Pesticide usage information is very much a matter of interest to those focusing on pest management issues and programs. Thanks also go to Prof. Gerald Carlson, Agricultural Economics Department, N.C. State, for helping to make this project come to fruition.

Arnold L. Aspelin, Ph.D.
